Here and There in the Legislature

(Continued From Third Page.)

Senator Holland wanted the salaries lowered. He thought an ordinary clerk could do the work, and he saw no use in paying a man more than the ordinary bank cashier gets. No opposition to the bill, as a whole, was shown.

The forces of Sawyer, late Nockemort, were before the House Committee on General Laws yesterday morning. They proposed changes in the laws in reference to examination for physicians so as to allow medical students to take examinations in schools at the end of two years as well as four years. This is to be more fair to the student and to obviate the necessity for "cramming" at the end of the course. Another change is giving the State board power to revoke the license of a physician for cause. Judge Martin Williams did not like the provision of the law which requires diplomas from a "reputable" medical school before the student is examined by the State board. He did not see why any one should not be allowed to take the examination. It was explained that in medical colleges the student gets practical training as well as instruction in theory.

As to the word "reputable," it was frankly the idea of the doctors to bar men who may have bought diplomas or who come from schools which give insufficient courses. There was no objection to admitting every one from the three Virginia schools.

Story of a Student.
One of the physicians told the committee of a case where a young man

was kicked out of a medical college in Richmond for cheating in his examination, at the end of his four-year course. He applied for a certificate to the effect that he had taken the four years of instruction. The head of the school at first refused, but finding that he would probably be compelled to do so by the courts, he wrote the certificate. Across its face, in red ink, he stated that the person had been expelled for dishonesty. This man went to the University of the South, at Seawance, Tenn., said the doctor before the committee, and there, upon his certificate of a four years' course, with the endorsement telling of his expulsion, he was graduated, came to Virginia and took his examination before the State Board. That body tried to bar him, but was advised by the Attorney-General that it could not do so. Mr. Monro, of Alexandria, asked for a law preventing dealing in bottles which have been picked from junk piles or refuse heaps. This is largely sanitary in its object, and would prevent boys from picking up and selling, or junk dealers from trading in, bottles of this character. It would not affect refilling of bottles by factories dealing in bottled goods.

A circus butted in on a fair association at Danville last fall, and Mr. Wilson, of that city, doesn't want it to happen again. He asked the committee to report a bill forbidding such a performance during a fair or immediately before or after it, unless under engagement with the fair officials.

One of those consecrated Christian women who are always seeking to do good distributed tracts in the Capitol rotunda yesterday. Approaching a member of the House, she asked: "Pardon me, sir, are you a Christian?" This member was in a hurry and answered abstractedly: "No, madam. I am a member of the Legislature."

Delegate Lee McClesney, of Bristol, was in his seat yesterday. Mr. McClesney has been absent for ten days, being called home by the illness of his wife, who died a week ago.

The far famed hotel bill was proposed in the House yesterday by Messrs. Edwards, Harwood and H. U. Stephenson. But it is the ghost of yesterday, for its various requirements have been largely amended.

A man in the Northern part of the State married his son's widow, in contravention of the law of the State. Nobody has raised an objection, and probably it was due to ignorance. To make this marriage legal and to legitimize the children, Mr. Over, of Fairfax, has offered a bill curing the situation so as to cover this case.

Clerks have been getting pretty big bunches of money for making lists of voters who have paid their capitation taxes. Mr. Johnston, of Montgomery, has a measure which he believes will bring the compensation down to something like a reasonable figure, while still making the allowance most generous. He would pay them 2 cents for each ten words in the original list, and for copies he would pay only the actual cost of reproducing the carbon or printed copy.

Mr. Johnston, of Montgomery, goes after the practice of allowing institutions to draw their entire appropriations from the State Auditor and spend them as they please. He introduced a bill in the House yesterday requiring that money shall be paid out only by the Auditor on warrants drawn on him, thus making each separate account, no matter how small, a certified claim against the Commonwealth.

The sterilization bill was acted upon favorably yesterday afternoon by the House Committee on Asylums and Prisons, and it will be reported to the House, to-day. It provides that the work shall be done only by qualified criminal, idiotic and imbecile, and then only upon endorsement by the resident surgeon of the institution, an alienist, the secretary of the State Board of Charities and another surgeon. The committee has given this bill the most careful consideration, having had several hearings.

Delegate John R. Rew, of Accomac, chairman of the Committee on the Chesapeake and Its Tributaries, is deep in the study of the forty-eight-page codification of the oyster laws of the State. There will be a hearing on this subject this afternoon at 3 o'clock. In

Harry Lauder

now sings only for the Victor

The great Scotch comedian, who is now the highest-priced and most famous entertainer in the world, was so delighted with his Victor Records, which he says "are simply 'to the life'", that he has signed a contract to henceforth make records only for the Victor.

And the new Victor Records of his amusing songs and specialties—just issued—are better than ever before, because they are made by the new Victor process of recording.

Mr. Lauder was so greatly impressed with the vast improvement in the tone-quality of Victor Records that he made over all his old records, so that not only his latest hits, but all of his songs, will be brought to you absolutely true to life.

Ten-inch Records
60000 I've Something in the Bottle for the Morning
60001 I Love a Lassie (My Scotch Bluebell)
60002 Stop Yer Ticklin', Jock
60003 Tobermory
60004 Wearing Kilts (That's the Reason Noo' I Wear a Kilt)

Twelve-inch Records
70000 Foo'le' Noo' (I've Something in the Bottle)
70001 He Was Very Kind to Me
70002 I Love a Lassie (My Scotch Bluebell)
70003 MacGregor's Toast
70004 Rob Roy MacIntosh
70005 Safest of the Family
70006 She's Ma' D
70007 Wedding o' Lauchie McGraw
70008 Wedding o' Sandy McNab
70009 When I Get Back Again to Bonnie Scotland

Any Victor dealer will gladly play these records for you. Ask specially to hear "Wearing Kilts" (60004)—Lauder's funny explanation of why he wears a kilt. If you have an old Lauder record, take it to a Victor dealer's for comparison, and note for yourself the wonderful advances recently made in the art of Victor recording.

Out today with the February list of new Victor Records

Ask any Victor dealer for a February supplement which gives a detailed description of each record.

To get best results, use only Victor Needles on Victor Records.

Victrola

the session this afternoon the committee will also take up the Wellford bill relating to the pollution of waters of streams by the products of fish factories.

Until a late hour last night the House Committee on Courts of Justice heard all sorts and conditions of pronouncements for amending the bill on pleadings. The discussion was almost altogether technical. The committee will consider the bills later. Many of these laws to which amendments are proposed apparently need revision, judging from the arguments presented. The hearing was held in the courtroom of the State Corporation Commission, and, in spite of the counter-attraction in the Senate chamber, was well attended.

WOMAN'S COLLEGE AT UNIVERSITY

Senator Strode, Dr. Alderman and Others Plead Eloquent-ly for Institution.

In behalf of a State college for the higher education of women, a strong appeal was made before the Senate and House Committees on Education last night in the hall of the Senate by Senator Strode, the author of the measure; Dr. Edwin A. Alderman, of the University of Virginia, and others. The hall was well filled by women interested in the proposed college and by many members of the Legislature.

As the patron of the bill, Senator

Strode, of Amherst, briefly explained his purpose. It seeks to establish as a branch of the University of Virginia, at Charlottesville, a college for women. Separate buildings are to be provided for this purpose, the classes being taught by the professors of the university, but co-education is to be strictly left out of the scheme. Under certain restrictions women might use the libraries, museums and laboratories. Senator Strode explained that by reason of the poverty of the average family, it could not send girls to higher private colleges, and that the State must therefore meet the crying educational demand. He only asks to present the passage of the bill, suitable appropriation to come later. Putting the college at Charlottesville will enable it to avail itself of fine educational material without cost.

Ex-Senator A. F. Thomas, of Lynchburg, spoke for the bill, explaining that it was indispensable to the progress of the people. Professor Stone, of the University of Virginia, presented a clear, logical argument, showing that the education of girls was of unsurpassed importance to the State. W. M. Thornton, of the same institution, advocated the higher education of women, saying that it is the inevitable trend of the times.

President Alderman prophesied the coming of such a college and felt that it was a debt to the Commonwealth and the past, who in war and peace did so

much in the public service of Virginia. He appealed in eloquent terms for the establishment of such a school and declared that the future welfare of the State depended upon the education and proper training of women. He hoped, he said, some day to see the degree of "B. S." or "Bachelor of Science" conferred by a college upon women. The college is sure to come, he felt, and wise will be the Legislature that wins immortality for itself by establishing such an institution.

ONCE PROLIFIC OYSTER ROCK DEPLETED NOW

(Continued From First Page.)

There have been, and are to-day, valuable natural resources, such as the bay or the Bayshore survey, which the State officials are trying to preserve for the public. They should be supported in this and permitted to include them within the geodetic lines, so that there may be no uncertainty as to the rights of applicants who are eager to lease them.

BILL PROVIDING FOR NEW OYSTER LINES

Full Text of Measure Empowering Commission of Fisheries to Rearrange Lines of Baylor Geodetic Survey in James River.

A bill empowering the Commission of Fisheries to rearrange the lines of the Baylor Geodetic Survey in James River, embraced within Warwick county; to rerun the State Geodetic Survey and mark with permanent buoys or marks; to provide for leasing certain barren ground in James River to citizens of the State; and to include within the geodetic survey such natural beds, rocks or shoals as may have been omitted, including Gunn Rock, in York River, in the county of York. Whereas, by the report of the Commission of Fisheries and the statements of the members thereof and by the statements of citizens residing along James River, necessarily appears for the rearrangement of the lines of the natural oyster rock of public ground No. 1, public ground No. 2, and public ground No. 3, in Warwick county; and that the State is attempting at great cost and without satisfactory results to protect the seed beds, because of the once-defined and irregular but now entirely vanished lines; and Whereas, the Board of Fisheries and the Commission of Fisheries have from time to time recommended that such lines be rearranged and the barren or depleted ground should with proper safeguards be leased to citizens of the State; and

Oyster Grounds Examined.
Whereas, by the request of the Governor and the Commission of Fisheries all the natural oyster grounds in the county of Warwick have been examined and a report thereof made to His Excellency Governor Swanson, and to the

State Commission of Fisheries by the United States Commissioner of Fisheries, which report shows that much of the 18,425 acres of said ground is barren or depleted; and Whereas, by the adoption of said recommendations from the Commission of Fisheries, supported by the survey of officials of the United States and by a plat of the proposed rearrangement of said lines, will save about \$5,000 annually to the State in expenses of guarding and will bring in an additional revenue from leased grounds of several thousand dollars per annum, and will enable the remaining area of about 14,000 acres to be effectually protected and preserved for the tanners as it can not now be, in the course of about two years doubling the area of prolific ground; and

Whereas, the Baylor Survey almost in its entirety has for years been nothing but an imaginary line, existing only upon paper, few if any of its corners remaining marked at this time, making it an impossibility for the county surveyors to relocate with any degree of accuracy but a small portion of the original survey by Captain Baylor; and Whereas, it is vital to the interest of the State to have the geodetic lines permanently marked and in places guarded by watchhouses; and Whereas, it can be made practicable to reseed depleted beds by shelling and scraping with bagless dredges when properly marked and guarded; and Whereas, from time to time areas of natural rock are discovered to have been omitted from the geodetic survey,

You'd stand on a corner or rush to a window any day to see a band go by.

The Victor makes the world's greatest bands parade before you as you sit in your easy chair—Pryor's Band, Sousa's Band, United States Marine Band, Garde Republicaine Band of France, Police Band of Mexico.

Come in and hear these famous bands play some of your favorite selections.

There is a Victor at every price from \$10 to \$100. Victrola, \$125 to \$250. Terms to suit.

Walter D. Moses & Co.,

103 East Broad Street

notably Gunn Rock, in York River, in the county of York.

To Rearrange Lines.
Therefore, be it enacted by the General Assembly of Virginia:

1. That public ground No. 1, public ground No. 2, and public ground No. 3, of the State Geodetic Survey in Warwick county be rearranged and made to run as follows, to-wit: Beginning at station No. 7, on public ground No. 1, Warwick county, as shown on James River chart No. 4 (a station on Kettle Hole Rock, near Gunn Rock); thence to White Shoal Light; thence in a straight line to Point of Shoals Light; thence in a straight line northerly and parallel to the present Baylor line (station No. 3 to station No. 5) to a point 1,000 yards from station No. 6, near Mulberry Point; thence in a straight line through Fall Island, and through a point (intersection of line from White Shoal Light to station No. 7 extended) on the geodetic line 800 yards southeast of station No. 8 to a point on Brown's Shoal, 2,000 yards to a point on chart in six feet of water; thence 4,000 yards to station No. 7, the point of beginning.

2. All the beds and bottoms of James River within Warwick county not comprehended within the lines aforesaid are hereby defined, declared and determined not to be natural oyster rocks, beds or shoals, and such portions of the beds and bottoms of James River within said county and not comprehended within the lines aforesaid, are hereby declared to be assignable.

3. The Commission of Fisheries be, and they are hereby, authorized and empowered to rent such unassigned beds and bottoms not within the said lines at a price not less than \$1 per acre per year to residents of this Commonwealth in parcels not exceeding 100 acres each, with such rules, regulations and restrictions as will best protect and advance the oyster industry of this Commonwealth.

Protect Depleted Rock.

4. The Commission of Fisheries be, and they are hereby, authorized and empowered to rerun such of the Baylor geodetic lines from time to time as their judgment dictates, marking the same by buoys, watch-houses or other permanent marks; and, whenever it shall come to the knowledge of the Commission of Fisheries that any part of the said Geodetic Survey, so marked is being depleted, said Commission shall be empowered after thirty days' notice by publication in the nearest newspaper to mark off such depleted rock, bed or shoal, or any portion thereof, and prohibit the taking of oysters therefrom for a period of two years, or less, in the discretion of the commission, in order to determine whether such depleted bottom will recuperate of itself, or by planting with shells or cultivating it otherwise. Any person taking oysters from such bottom, so marked off, shall be subject to the same penalty provided for the same penalty pro-

vided for taking or catching oysters from the natural rocks, beds, or shoals in the prohibited season.

To Define Barren Land.

5. It shall be the duty of the Commission of Fisheries in its regular reports to the General Assembly to designate and accurately define any barren oyster bottom which the commission shall have examined and known to be within the State Geodetic Survey, and which may be available for planting purposes without jeopardy to the natural rocks, beds, or shoals. Said commission shall also designate and accurately define any productive or recuperating natural oyster beds, rocks, or shoals, without the lines of the State Geodetic Survey, and which is not taken up for planting purposes, which in the opinion of said commission it would be advisable to embrace within the said Geodetic Survey.

6. The Commission of Fisheries is hereby empowered and directed to have the natural bed, rock, or shoal, known as Gunn Rock, in York River, in the county of York, marked and platted, and the said Gunn Rock as so marked and surveyed shall thereafter be considered as being embraced within the Geodetic Survey of natural rocks and held for the public use of the citizens of this Commonwealth.

Children Cry FOR FLETCHER'S CASTORIA

Office of
Carroll Whitaker, Attorney,
Saugerties, N. Y.
Dear Madam: In my innocence I purchased in New York (100 miles from here) a box of
"PIN-MONEY PICKLES,"

It brought me great trouble, and one of three things must occur:
1. You must stop making them;
2. I must get them at less expense;
or,
3. I'm a ruined man.

Since my arrival here I've had many "jars." My family from early morning "Pleasures," neighbors ring the door bell and shout "Pleasures," relatives "visit" me. In expectation of "Pleasures." Your pickles are my Nemesis. Please, Dear Madam, quote them by the Keg, Barrel, Hogshead, Ton or Shipload, and "preserve" me. Yours very truly,
CARROLL WHITAKER,
MRS. E. G. KIDD, Richmond, Va.

Sale of Fine Plates at E. B. Taylor Co.'s

23 West Broad Street.

As our spring importations are soon to arrive, we have determined to sell all of our Fine Plates to make room for our spring stock.

These Plates are in half dozen and one dozen lots.

One dozen Dinner Plates, English Bone China, Minton Decoration	Was \$13.50, now \$8.50
